This presentation on a-iTrust’s results for the quarter ended 31 December 2018 (“3Q FY18/19”) should be read in conjunction with a-iTrust’s quarterly results announcement, a copy of which is available on www.sgx.com or www.a-iTrust.com.

This presentation may contain forward-looking statements that involve risks and uncertainties. Actual future performance, outcomes and results may differ materially from those expressed in forward-looking statements as a result of a number of risks, uncertainties and assumptions. Representative examples of these factors include (without limitation) general industry and economic conditions, interest rate trends, cost of capital and capital availability, competition from other developments or companies, shifts in expected levels of property rental income and occupancy rate, changes in operating expenses (including employee wages, benefits and training, property expenses), governmental and public policy changes and the continued availability of financing in the amounts and the terms necessary to support future business. Investors are cautioned not to place undue reliance on these forward-looking statements.

All measurements of floor area are defined herein as “Super Built-up Area” or “SBA”, which is the sum of the floor area enclosed within the walls, the area occupied by the walls, and the common areas such as the lobbies, lift shafts, toilets and staircases of that property, and in respect of which rent is payable.

The Indian Rupee and Singapore Dollar are defined herein as “INR/₹” and “SGD/S\$” respectively.

Any discrepancy between individual amounts and total shown in this presentation is due to rounding.

Currency hedging strategy

Balance sheet

- Trustee-Manager does not hedge equity.
- At least 50% of debt must be denominated in INR.

Income

- Income is repatriated semi-annually from India to Singapore.
- Trustee-Manager locks in the income to be repatriated by buying forward contracts on a monthly basis.

Funding strategy

- The Trustee-Manager's approach to equity raising is predicated on maintaining a strong balance sheet by keeping the Trust's gearing ratio at an appropriate level.
- Trustee-Manager does not borrow INR loans onshore in India as it costs less to hedge SGD borrowings to INR-denominated borrowings using cross-currency swaps and derivatives.

Income distribution policy

- To distribute at least 90% of its income available for distribution.
- a-iTrust retains 10% of its income available for distribution to provide greater flexibility in growing the Trust.
