CLINT's Growth Levers

Capital Management

Currency Hedging Strategy

Balance sheet

- Trustee-Manager does not hedge equity
- At least 50% of debt must be denominated in INR

Income

- Income is repatriated semi-annually from India to Singapore
- Trustee-Manager locks in the income to be repatriated by buying forward contracts on a monthly basis

Funding Strategy

- The Trustee-Manager's approach to equity raising is predicated on maintaining a strong balance sheet by keeping the Trust's gearing ratio at an appropriate level
- Trustee-Manager maintains a portfolio of loans comprising both offshore S\$-denominated loans and onshore INR-denominated loans
- A portion of the offshore S\$-denominated loans are hedged into INR via cross-currency swaps and derivatives. Onshore INR-denominated loans serve as a natural hedge

Income Distribution Policy

- To distribute at least 90% of its income available for distribution
- CLINT retains 10% of its income available for distribution to provide greater flexibility in growing the Trust
