Financial Highlights

- ✓ The increase in TPI and NPI in INR terms was driven by the sustained performance of existing properties, along with contributions from new developments, including MTB 6, and the partial handover of CapitaLand Data Centre (DC) Navi Mumbai Tower 1 since July 2025
- ✓ The decline in TPI and NPI in SGD terms was mainly due to foreign exchange movements
- ✓ Raised S\$150 million through private placement for funding of forward purchases
- ✓ Advanced distribution of 1.44 Singapore cents for 1 January to 4 March 2026 paid on 10 April 2026

Steering Through Macro Headwinds

Artificial Intelligence (AI)

- Impact of AI on space requirements by occupiers

- ✓ Evolving space requirements towards more modular, AI-compatible layouts, supported by reliable digital infrastructure
- ✓ India's Global Capability Centres (GCCs) landscape is strengthening as GCCs scale up their role as global AI-led innovation hubs¹
- ✓ IT sector and GCCs contributed to record office absorption of ~83 million sq ft in 2025¹
- ✓ Proactive portfolio management and asset enhancement initiatives ensures CLINT's assets remain competitive

Geopolitical Tensions

- Rising energy prices globally
- Inflationary pressure

- ✓ 57% of CLINT's energy requirements come from renewable energy in FY 2025
- ✓ Utility costs form part of common area maintenance expenses which are largely recovered from tenants, resulting in no material impact on net property income
- ✓ Proactive cost management and monitoring of any inflationary impact on development projects

Foreign Exchange Risks

- Depreciating India Rupee

- ✓ CLINT to increase onshore India debt to 40-50% of total borrowings over the next few years to increase natural hedge
- ✓ 54% of debt is denominated in INR as at 1Q 2026
- ✓ Monthly forward contracts to lock in semi-annual repatriation of income from India to Singapore
- ✓ Hedge future expected cashflows from INR to SGD
